

Power wheelchairs

MyPermobil App

permobil

Knowledge is power

The MyPermobil app empowers you to do more and go further by sending real-time power wheelchair insights directly to your smartphone. Stay informed and feel confident as you get the most out of your Permobil power wheelchair.

Battery status and travel range estimates show how far you can go.

Take the pressure off with meaningful insights into your power seat function usage.

See how far you've gone by reviewing your travel history.

App dashboard makes key information available at a glance

Integrated map illustrates daily and historic travel behaviour

Easy to enable or disable location settings

Travel with confidence

From where you've been to where you want to go, the MyPermobil app helps guide your power wheelchair journey. Combining in-app estimated battery range travel distances with the integrated map empowers you to go further with confidence.

Hands-free insights

With the MyPermobil Action on Google or Skill through Amazon Alexa, you can access important wheelchair information such as your battery charge status, distance travelled, and power seat function usage all using your voice. Use at home or when you're on the go with any Amazon Alexa or Google Assistant enabled device or smartphone app.

Hey Alexa! Ask MyPermobil, how far can I drive?

You can drive 19 kilometres outdoors and 18 hours indoors.

Taking connectivity to a new level

Connecting users and service technicians through a single intuitive platform improves communication and helps you be better prepared for the unexpected. Once activated, critical chair data and error codes are transmitted automatically to the service provider's Fleet Management portal. This provides them with important information on your chair's condition to inform the remote diagnostic and service process.

MyPermobil connectivity comes standard on all new M & F-Series Corpus & Corpus VS models. Download the app to get started today.
