

Fleet Management: Driving Service Excellence

Fleet Management gives service providers access to valuable wheelchair data and analytics. Battery system information, fault codes, actuator function, motor current, and order history are transmitted automatically, improving remote diagnostic and service capabilities for your user's connected wheelchairs.

Use the system log for real-time access to system messages, including errors and warnings, plus view suggested actions to remedy an error

Use the search feature to quickly find needed information

Accessible across multiple devices (laptop, tablet or smartphone)

Reference technical videos and manuals in the Fleet Management Knowledge hub in preparation for, or during a service visit

Get started today.

Fleet Management creates a more reliable and convenient service experience and, unlike other systems, does not require use of the user's Wi-Fi or data to transmit valuable wheelchair diagnostic information. Power Platform and + Connect form the core digital infrastructure of Permobil power wheelchairs, combining advanced assistive technology with smart connectivity. Connected from the factory*, the chair is online and ready for proactive service, remote insights, and efficient support from day one. The connected chair reflects Permobil's commitment to reliability, transparency, and confidence over the life of the chair.

1. Sign up for access to Fleet Management.
2. Utilise the Fleet Management portal to inform remote diagnostics and create a proactive service experience for your customers.
3. Have the user download the MyPermobil app to gain insights in their chair performance, battery health, and seating information. MyPermobil also allows personalised light colours.

Scan the QR code to learn more about Fleet Management.

**From 1 July, 2026, for chairs delivered in New Zealand.*
